

The **ABT4003 Switch Wear gauge (folding)** is a lightweight inspection tool allowing the user to visually check for wear in switch and crossing using calibrated Gauge 1 and Gauge 2 profiles. The gauge can also be folded away for easier storage and transportation. Constructed from hard wearing GRP, the Switch Wear Gauge is electrically non-conductive making it suitable for use in areas of 3rd rail electrification.

- Checks lateral wear of stock rail
- Checks wear of rail within planning length
- Constructed from non-conductive GRP and Nylon 6 with stainless steel

Technical Specification

Weight	- 2.5kg	Inspection	- Gauge 1 Gauge 2
Size (folded)	- 1820mm x 130mm x 90mm
